DESCRIPTION:

CHA Series

Cernex's **CHA** series horn lens antenna consists of a circular scalar feed horn illuminating a plano-convex lens. Housed in either aluminum or plastic, these horn lens antennas provide a high efficiency beam with equal E and H plane amplitude patterns. The CHA series antennas are available from 12.4 to 140 GHz in standard sizes of 3, 5, 6, 9, and 12-inch lens apertures. Other custom sizes and configurations are available; please consult Cernex for further information.
